

A message to Canadians in the Freedom Convoy

23 lutego 2022

There is a simple way to go on the counteroffensive:

1. Boycott electronic transactions.
2. Withdraw all savings from banks.
3. Paying for purchases in cash.
4. Refraining from buying new cars (probably there are limits on cash transactions anyway) and goods of large corporations.
5. Buying products from local stores owned by people who support the protest.

Banksters and megacorporations will go into a panic because the construction of the NWO is based on electronic transactions. In 10 years time such a protest will not succeed, because they plan to abolish cash to control people by cutting off money, but today there is and such a protest in Canada possible despite cutting people off from many stores with injunctions.

Please spread this idea. It can work. They will not send the police to beat disobedient customers with batons.
