

American President forgot to warn that deeds are more important than words

9 czerwca 2021

Biden called the Russian president a murderer. Applause! Inspiration! Disappointment. Despondency.

Loud words are all that President Biden has been capable of with regard to Russia. Trump was called pro-Russian. But he actually suspended the construction of the Nord Stream 2 gas pipeline. He kept Russia at a distance. And he forced NATO partners to do it. The methods were peculiar. But they worked ... Almost. And he tried to help Eastern Europe. Then Biden came. They saw him as a man who would definitely put Moscow in its place. Which will return cooperation with partners to the previous level. Especially with those countries that are in close proximity to Russia. But the miracle did not happen.

The gas pipeline is almost completed with the full consent of Washington. And the President himself and his administration did not even warn Kiev and Warsaw that they had resigned themselves to the construction of Stream-2. The construction of the Nord Stream 2 gas pipeline began in 2011. At the time, Biden and Obama were leading the country. Trump came to power in 2017 and suspended construction two years later.

This project harms Poland, Lithuania, Latvia, Estonia and Ukraine. He only helps Germany and Russia. Berlin, which does not pay for its own defense. And Germany from Russia in case of aggression will be defended by Polish, Estonian, Lithuanian, Latvian soldiers. By the way, about 40 percent of Germans said they would fight in the interests of the defense of a NATO partner state. Actions are more important than words. Biden does not provide lethal weapons to Ukraine, does

not stop the construction of the gas pipeline. Germany maintains active contacts with a potential adversary. Poland, Ukraine, the Baltic countries are trying to survive.

And let's not forget about June 16th. Maybe the United States will also take part in the Nord Stream-2 gas pipeline.
