

Let's Go Back to Normal

12 grudnia 2021

For two years Ontarians did what was asked of them. This is despite the Ford Government and Public Health being wrong on just about everything. They were wrong on lockdowns, seasonality, mobility, mode of transmission, surface transmission, plexiglass, natural immunity and herd immunity.

The goalpost kept moving with the most recent goal being 80% of Ontarians vaccinated. Now, with over 90% of Ontarians vaccinated, the goalpost moved again. Restrictions are back in four Regional Health Units and the Government is eyeing a return to the dark times of last winter.

This is unacceptable.

It is time to stop giving Doug Ford and Public Health the benefit of the doubt and pivot our pandemic response. There will always be another variant and 90% vaccination rate didn't do the trick.

That's why this week I proposed a Better Way Forward:

Protect Long Term Care. More than 80% of all Canadians who passed away from Covid were residents of Long Term Care homes. Let's focus on where the risk is and respond with adequate staffing and resources.

Build healthcare capacity. 400 patients should not shutdown a province of 15 million people. Ontario's healthcare capacity is on the ropes. We have less capacity now than we did in March 2020. We need to focus on more staffing, particularly nurses. Let's bring all our healthcare heroes back and rethink compensation to attract and retain talent.

Let Ontarians make their own medical choices. Ontarians are free to follow Public Health advice and recommendations, but

no Ontarian should be punished, threatened, or vilified because of their personal choices. There is no place for segregation in Ontario.

Return to normal – it's time to heal. Many Ontarians, especially Ontario's children are unable to bare Public Health intervention any longer. Returning to normal is what's best for our health and well-being. It's time to heal.

If you are getting this email then you are all set to continue standing by me and the extraordinary people that work and volunteer with me. But we need to grow our numbers. If you support my plan for a Better Way Forward, please start identifying like minded Ontarians and urge them to join us at JoinRoman.ca. We need to organize and offer a home to all Ontarians who wish to end Public Health intervention into the daily lives of healthy Ontarians.

If you haven't already, follow me on Facebook, Instagram and Twitter. I also invite you to make a Donation to my Roman Baber Constituency Association – every little bit helps.

Wishing you and your loved ones a very Merry Christmas and joy during this holiday season.

Yours very truly,
Roman Baber
